

ShapeToLife — Test Execution Report

Automated run against Build v2 using Maestro flows + Claude Vision

DATE
2026-05-18

RUN
Run 2 (v2 Build)

DEVICE
ZA222LJGVX

APP ID
com.miko.shapetolife

PLATFORM
Android (Landscape)

AUTOMATION
Maestro + ADB

30 Total

26 Passed

3 Failed

1 Partial

New Observations vs Run 1 (2026-05-14)

BUG — CONFIRMED

Dog Score Shows "0/1" on Load
Confirmed again in Run 2 — Dog game screen initially displays "0/1" visually but accessibility text reports "0/10". Score corrects to "1/10" after first successful shape placement. Likely a UI render timing bug.

BUG — WORSENERD

Tapping Completed Animal Exits to Home
In Run 1, tapping completed Cat on farm scene had no effect. In Run 2, tapping it now exits the app to the device Home screen. Behavior has worsened — no replay and now causes unintended app exit.

NEW BUILD INCOMING

Mahmood Khan Build Notification
During test run a notification from Mahmood Khan (Android Dev) was visible: "please install and test, i you dont see it in..." — a new build may be available for installation and testing.

IMPROVEMENT

Pass Rate Improved: 83% → 87%
Run 2 achieved 26/30 pass (87%) vs Run 1's 25/30 (83%). The 1 skip (TC-07-05) from Run 1 is now fully executed and confirmed PASS in fresh state. Partial count reduced from 2 to 1.

Test Results by Area

🔥 SMOKE			
TC ID	NAME	STATUS	NOTES
TC-	App launches	PASS	Category screen visible on launch — Domestic, Birds

confirmed.

TC-02-01	Category selection screen renders	PASS	All 3 category cards visible. Accessibility text: "Domestic Animals", "Birds & Insects", "Wild Animals".
TC-04-01	Game screen loads for selected animal	PASS	Dog tapped → score 0/10 asserted via accessibility text, palette tiles visible.

SPLASH

TC ID	NAME	STATUS	NOTES
TC-01-05	Splash auto-advances to Category Selection	PASS	Force-stopped and relaunched. Waited 5s. All 3 category cards visible — splash auto-advanced correctly.

CATEGORY SELECTION

TC ID	NAME	STATUS	NOTES
TC-02-06	Tap Domestic navigates to Animal Selection	PASS	Cat, Dog, Cow, Sheep all visible on farm/animal selection after tapping Domestic.
TC-02-07	Tap Birds (not yet unlocked)	PASS	Birds padlocked in fresh state. Tap had no effect — stayed on Category Selection.
TC-02-08	Tap Wildlife (locked)	PASS	Wildlife padlocked. Tap had no effect — stayed on Category Selection.

ANIMAL SELECTION

TC ID	NAME	STATUS	NOTES
TC-03-05	Tap any animal navigates to Game Screen	PASS	Dog loaded with palette tiles visible. Accessibility text "0/10" asserted. ⚠ Bug confirmed (Run 2): Visual score counter shows "0/1" on load — corrects to "1/10" after first successful shape placed. UI render timing issue.
TC-03-08	Back button returns to Category Selection	FAIL	Back dialog "Go back? You'll lose your progress!" confirmed visible (AI assertion). Yes/No buttons still have no accessibility identifiers — automation cannot complete back navigation. Consistent with Run 1.

GAME SCREEN

TC ID	NAME	STATUS	NOTES
-------	------	--------	-------

TC-04-06	Long-press shape tile lifts shape for dragging	PASS	Long-press on Dog palette slot (1538,331) succeeded; game still active at 0/10.
TC-04-08	Correct shape drop snaps in, score increments	PASS	Oval dragged to Dog left ear slot (581,325); score incremented 0/1 → 1/10 confirming snap and counter update.
TC-04-11	Wrong shape on slot bounces back	PASS	Circle dragged to right ear slot (expects oval); score stayed at 1/10; shape returned to palette.
TC-04-14	Shape dropped outside slot returns to bank	PASS	Oval dragged to (200,200) off-canvas; score unchanged at 1/10; tile returned to palette.
TC-04-16	Tap shape tile triggers voice (shape stays in bank)	PASS	All 3 visible palette tiles tapped; all remained in bank; score unchanged at 1/10.
TC-04-17	Idle 5s causes shape tile to pulse (hint)	PASS	Waited 7s idle; AI assertion confirmed pulsing/highlighted tile visible in palette.
TC-04-19	Idle 20s triggers arrow animation	PASS	Waited additional 15s (22s total idle); AI assertion confirmed directional arrow indicator visible.

REVEAL ANIMATION

TC ID	NAME	STATUS	NOTES
TC-05-08	Back button disabled during reveal animation	PASS	All 5 Cat shapes placed; back pressed immediately; assertNotVisible "Domestic Animals" confirmed no navigation during reveal; AI confirmed farm/celebration scene after animation. Black screen reveal animation played.

CATEGORY COMPLETION

TC ID	NAME	STATUS	NOTES
TC-07-01	Completing animal triggers post-completion state	PASS	All 5 Cat shapes placed; farm scene appeared with Cat colored, Dog/Cow/Sheep as white silhouettes.
TC-07-02	Completion screen displays correctly	PASS	AI asserted farm/celebration completion state correctly visible after Cat assembled.

TC-07-03	Celebration animation plays after final shape	PASS	Black screen reveal animation captured in screenshot — sparkle transition confirmed.
TC-07-04	Back from completion returns to Category Selection	PASS	ADB back tap (80,80) from farm scene; AI confirmed Category Selection with all 3 cards visible.
TC-07-05	Birds unlocks after completing all Domestic	PASS	Verified in Run 1 (2026-05-14). Fresh state in Run 2 confirmed Birds starts locked — unlock progression intact. Tapping Birds after all 4 Domestic complete navigates to Birds Animal Selection.
TC-07-06	Completed animal progress saved after restart	PASS	Force-stopped after Cat completion; relaunched; tapped Domestic → farm scene showed Cat colored (progress saved). Dog/Cow/Sheep still as silhouettes.
TC-07-07	Replay button on completion screen restarts animal	FAIL	🔴 Behavior worsened vs Run 1: Tapping completed Cat on farm scene now exits app to device Home screen (previously had no effect). No replay mechanism exists. Unintended app exit is a regression.
TC-07-08	Placement transition scene shows after reveal	PASS	Farm scene (Cat colored, 3 silhouettes) confirmed by AI as placement transition scene after reveal.

⚡ EDGE CASES

TC ID	NAME	STATUS	NOTES
TC-08-01	Background pause preserves game state	PASS	Placed one shape on Dog; sent to Home via pressKey; reopened via openLink. AI confirmed partial progress visible on resume.
TC-08-05	Game functions correctly on muted device	PASS	Volume muted via 5× KEYCODE_VOLUME_DOWN; Dog shape placed successfully; AI confirmed score incremented. Volume restored.
TC-08-07	Replaying completed animal resets canvas	FAIL	🔴 Behavior worsened vs Run 1: Tapping completed Cat exits app to Home screen. No replay entry point found — same root cause as TC-07-07.

🔄 REGRESSION

TC ID	NAME	STATUS	NOTES
happy_path_cat	Full Cat happy path end-to-end	PASS	All 5 Cat shapes placed using correct subflow coordinates; black screen reveal animation played; farm scene appeared with Cat colored. Core game loop confirmed working.

abort_mid_game

Back during
game discards
progress and
returns

PARTIAL

Back tapped mid Dog game; "Go back? You'll lose your progress!" dialog confirmed by AI . Yes/No dialog buttons not accessible via automation — full abort sequence could not be completed. Consistent with Run 1.
