## New Build Changes Detected

### NEW FEATURE

#### Back Confirmation Dialog

Tapping Back during a game now shows "Go back? You'll lose your progress!" with Yes / No buttons. Was an instant-back in v1.

### BUG

#### Dialog Buttons Not Automatable

Yes/No buttons in the back-confirmation dialog have no accessibility semantics — tapOn text "Yes" returns element-not-found. Blocks automation of any back-navigation from game screen.

### NEW SCREEN

#### Farm Scene Post-Completion

After completing an animal the app shows a farm scene where the completed animal is fully colored and remaining animals appear as white silhouettes to tap. Replaces the old auto-return to Animal Selection.

### CHANGED

#### Category Screen Redesign

Category cards completely restyled with illustrated thumbnails and gold padlocks. Labels shortened: "Domestic Animals"→"Domestic", "Birds & Insects"→"Birds", "Wild Animals"→"Wildlife". Exit button changed to a red X icon.

### CHANGED

#### No Replay for Completed Animals

In v1, selecting a completed animal restarted it. In this build, tapping the colored Cat on the farm scene does not navigate to a game screen — no replay mechanism found.

### CHANGED

#### Dog Shape Count (Observed: 0/1)

After TC-03-05 passed with "0/10" assertion, a screenshot showed Dog at "0/1". Possible score counter display change or regression in Dog's shape count. Needs further investigation.

## Test Results by Area

### SMOKE

| TC ID    | NAME                                  | STATUS | NOTES                                                                                                                                                                           |
|----------|---------------------------------------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| TC-01-01 | App launches successfully             | PASS   | Splash auto-advances; Domestic / Birds / Wildlife all visible on Category Selection.                                                                                            |
| TC-02-01 | Category selection screen renders     | PASS   | Category labels changed: "Domestic Animals" → "Domestic", "Birds & Insects" → "Birds", "Wild Animals" → "Wildlife". Existing flow assertions still pass via accessibility text. |
| TC-04-01 | Game screen loads for selected animal | PASS   | Tapped Cat → score 0/5 and palette tiles visible.                                                                                                                               |

### SPLASH

| TC ID    | NAME                                       | STATUS | NOTES                                                       |
|----------|--------------------------------------------|--------|-------------------------------------------------------------|
| TC-01-05 | Splash auto-advances to Category Selection | PASS   | Domestic / Birds / Wildlife confirmed visible after splash. |

### CATEGORY SELECTION

| TC ID    | NAME                                       | STATUS | NOTES                                           |
|----------|--------------------------------------------|--------|-------------------------------------------------|
| TC-02-06 | Tap Domestic navigates to Animal Selection | PASS   | Cat, Dog, Cow, Sheep all visible after tap.     |
| TC-02-07 | Tap Birds (not yet unlocked)               | PASS   | Tap has no effect; stays on Category Selection. |
| TC-02-08 | Tap Wildlife (locked)                      | PASS   | Tap has no effect; stays on Category Selection. |

### ANIMAL SELECTION

| TC ID    | NAME                                    | STATUS | NOTES                                                                                                                                                                                                                                                                |
|----------|-----------------------------------------|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| TC-03-05 | Tap any animal navigates to Game Screen | PASS   | Dog loaded; 0/10 score and palette tiles asserted.<br> Observation: screenshot after test showed score "0/1" — possible Dog shape count change in new build. Needs investigation. |
| TC-03-   | Back button returns to Category         | FAIL   |  New build shows "Go back? You'll lose your progress!" confirmation dialog. The Yes/No buttons have no accessibility identifiers and cannot                                       |

## GAME SCREEN

| TC ID    | NAME                                                | STATUS | NOTES                                                                             |
|----------|-----------------------------------------------------|--------|-----------------------------------------------------------------------------------|
| TC-04-06 | Long-press shape tile lifts shape for dragging      | PASS   | Long-press on cat_palette_circle_2 succeeded; game still active.                  |
| TC-04-08 | Correct shape drop snaps in, score increments       | PASS   | Triangle dragged to left ear slot; score incremented 0/5 → 1/5.                   |
| TC-04-11 | Wrong shape on slot bounces back                    | PASS   | Oval dragged to triangle ear slot; score stayed at 1/5; oval returned to palette. |
| TC-04-14 | Shape dropped outside slot returns to bank          | PASS   | Triangle dragged off-canvas; score unchanged; tile returned to palette.           |
| TC-04-16 | Tap shape tile triggers voice (shape stays in bank) | PASS   | All 3 palette tiles tapped; all remained in bank; score unchanged.                |
| TC-04-17 | Idle 5s causes shape tile to pulse (hint)           | PASS   | AI assertion confirmed pulsing/highlighted tile after 7s idle.                    |
| TC-04-19 | Idle 20s triggers arrow animation                   | PASS   | AI assertion confirmed arrow indicator visible after 22s total idle.              |

## REVEAL ANIMATION

| TC ID    | NAME                                         | STATUS | NOTES                                                                                                                                             |
|----------|----------------------------------------------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| TC-05-08 | Back button disabled during reveal animation | PASS   | Back pressed immediately after final shape; assertNotVisible "Cat" confirmed no navigation away during reveal. AI asserted reveal screen visible. |

## CATEGORY COMPLETION

| TC ID    | NAME                                             | STATUS | NOTES                                                                                                                                                                                                                   |
|----------|--------------------------------------------------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| TC-07-01 | Completing animal triggers post-completion state | PASS   |  New farm scene screen: Cat appears colored, other 3 animals as white silhouettes. Old behavior was auto-return to Animal Selection. |
| TC-07-02 | Completion screen displays correctly             | PASS   | AI asserted completion/celebration state visible after Cat was assembled.                                                                                                                                               |
| TC-07-   | Celebration animation plays                      | PASS   | Black screen reveal + sparkle animation confirmed by AI assertion.                                                                                                                                                      |

|          |                                                    |      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|----------|----------------------------------------------------|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| TC-07-04 | Back from completion returns to Category Selection | PASS | ADB back tap (80,80) from farm scene navigated to Category Selection. Domestic / Birds / Wildlife cards visible.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| TC-07-05 | Birds unlocks after completing all Domestic        | PASS | Completed all 4 Domestic animals (Cat  Cow  Sheep  Dog  ). Navigated to Category Selection — Birds card showed with no padlock. Tapping "Birds" navigated to Birds Animal Selection (4 bird silhouettes visible). Wildlife remains locked.  Unlock progression confirmed working. |
| TC-07-06 | Completed animal progress saved after restart      | PASS | After force-stop + relaunch, farm scene showed Cat colored (completed). Cow/Sheep/Dog still silhouettes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| TC-07-07 | Replay button on completion screen restarts animal | FAIL | No replay mechanism found in new build. Tapping completed Cat on farm scene does not navigate to a game screen. No "Replay" button visible anywhere.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| TC-07-08 | Placement transition scene shows after reveal      | PASS | Farm scene (Cat colored, 3 silhouettes) confirmed by AI as placement transition scene.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

### EDGE CASES

| TC ID    | NAME                                     | STATUS | NOTES                                                                                                                       |
|----------|------------------------------------------|--------|-----------------------------------------------------------------------------------------------------------------------------|
| TC-08-01 | Background pause preserves game state    | PASS   | Placed one shape on Cow (0→1/12), sent to Home, reopened via openLink. AI confirmed partial progress visible on resume.     |
| TC-08-05 | Game functions correctly on muted device | PASS   | Volume muted via 5× Volume Down; shape placed successfully; AI confirmed score incremented. Volume restored.                |
| TC-08-07 | Replaying completed animal resets canvas | FAIL   | Cat is already completed but tapping it on farm scene has no effect. No replay / restart entry point found in new build UI. |

### REGRESSION

| TC ID          | NAME                           | STATUS | NOTES                                                                                                                         |
|----------------|--------------------------------|--------|-------------------------------------------------------------------------------------------------------------------------------|
| happy_path_cat | Full Cat happy path end-to-end | PASS   | All 5 Cat shapes placed; reveal animation played; new farm scene appeared with Cat colored. Core game loop confirmed working. |

progress and  
returns

feature ). But Yes/No dialog buttons not accessible via  
automation — full abort sequence could not be completed.
